

26 January 2010

## **TEAM Informatics, Inc. acquires Frontline Logic, Inc. – a leader in Oracle UCM (Stellent) Solutions**

### **Oracle E2.0 Pillar Partners combine to expand offerings**

ST. PAUL, MN, January 26, 2010 – TEAM Informatics, Inc. (“TEAM”) announces today that it has completed the acquisition of Frontline Logic, Inc. (“Frontline”), a software engineering firm focused on Oracle Universal Content Management (UCM) solutions (formerly Stellent), Google enterprise search, and Kofax document imaging. Both TEAM and Frontline are Certified Partners in the Oracle® Partner Network (OPN).

Based in Kokomo, Indiana, Frontline was formed in 2001 and built the reputation as a leader in Stellent enterprise content management solutions. With the acquisition of Stellent in 2007 by Oracle, Frontline has become an Oracle partner and grown successfully. In addition, Frontline has programs underway with Google Search Appliance and Kofax technologies, as well as a comprehensive ECM training offering. The Frontline customer base consists of 90+ organizations such as State of Alaska, U.S. Department of Energy, Eaton Corporation, The University of Akron, and The Ohio State University.

Dave Shannon, TEAM’s CEO said, “we have known about Frontline for years as a respected company working in areas similar to TEAM, although we had only encountered them competitively a couple times. As we began working together, we both saw the complementary nature of our strengths and market presence.”

Brent Seaman, Frontline’s CEO added, “Frontline began working as a partner with TEAM almost a year ago. In addition to the complementary nature of our capabilities, we found a compatibility of culture including an unrelenting focus to serve customers with high-quality offerings. This ultimately spawned discussions to combine forces to address the rapidly growing opportunity in the enterprise content management market.”

For both companies, Oracle Fusion Middleware is the flagship capability. Within Fusion Middleware, TEAM is an Oracle Pillar Partner for Enterprise 2.0 in the US and Australia-New Zealand regions. E2.0 includes UCM, WebCenter, Records Management, Imaging, and Business Process Management. TEAM and Frontline have been aggressively establishing partnerships in other Fusion areas such as Identity Management, Service Oriented Architecture, Business Intelligence, and Platforms/DB. Together, these Oracle products form the industry leading foundation for applications.

The combined company has offices in St. Paul, Kokomo, Sydney, and Anchorage. Frontline staff are integrating with TEAM to work on customer engagements, support and data center services, and product development programs involving Oracle, Google, Kofax and other technologies. Brent Seaman has joined TEAM’s executive staff.

#### **About TEAM Informatics, Inc.**

TEAM Informatics, Inc. is a Minnesota-based software engineering firm with 150+ customers in North America and other parts of the world. TEAM has a strong presence in the Australia-

New Zealand market through its affiliated company, TEAMFusion5 Pty Ltd. TEAM is a preferred E2.0 Fusion Middleware partner with Oracle, specializing in areas such as portal and enterprise content management. Offerings include expert professional services, managed services such as support and data center hosting, and a growing set of ECM-related products. TEAM is privately held, owned by its 65 employees, and has experienced a 75% compounded annual growth rate over the past decade.

**About Frontline Logic, Inc.**

Founded in 2001, Frontline provides productivity solutions for growing organizations. The company focuses on imaging services for document management and processing of records, transactions, and projects. The firm offers security systems to protect company data and information systems. Frontline also provides web structure capabilities for management of online content, publishing, and update procedures. Frontline Logic is located in the Inventrek Technology Park, a high-tech business community in Kokomo, Indiana, and maintains an office in Anchorage, Alaska.
