Fadel Partners, Inc. and TEAM Informatics, Inc. Form Strategic Alliance

Two award winning partners form alliance to provide a full suite of services that cover both Oracle Fusion Middleware and Oracle Applications

ST. PAUL, MINNESOTA; January 14 — Fadel Partners, Inc. (“Fadel”) and TEAM Informatics, Inc. (“TEAM”) are now combining forces to create a single go to Oracle partner for the implementation of leading edge projects that include enterprise portals, content management and digital asset management, SOA as well as Oracle Applications. The alliance of these two award winning¹ partners uniquely presents Oracle clients with a single entity to handle cutting edge projects bringing the expertise of traditional Oracle Applications along with the implementation capabilities of the newest technologies in the Fusion Middleware Suite, specifically content management, social networking, advanced WebCenter portal technology and SOA based integration. Both Fadel and TEAM are Certified Partners in the Oracle® Partner Network (OPN).

“As Oracle continues to add industry leading technologies to its Fusion Middleware Suite, it becomes increasingly difficult for a single partner organization to deliver top quality services in all required elements of a deployment. Our alliance with TEAM provides our clients with a broad knowledge of implementation best practices that now cover the complete Fusion Middleware Suite as well as Oracle Applications” says Tarek Fadel, Fadel’s founder and CEO. Dave Shannon, TEAM’s president and CEO adds, “Since both Fadel and TEAM are award winning partners in their own right, we see our strategic alliance on the Middleware front as a compelling service offering to Oracle clients.”

For Oracle Application customers, this alliance offers a single source for Applications consulting and integration expertise (SOA Suite), and also the expertise to extend those existing business applications with content management (imaging, scanning and document management) WebCenter Portal (Social Networking, Collaborative Work Spaces, Composite Applications.)

From the Oracle technology perspective, this alliance offers the ability to create advanced Web based experiences where employees, customers and partners can collaborate and share information using WEB 2.0 based technologies (Blog, Wiki, Social Networking, Composite Applications).

About Fadel Partners, Inc.

Fadel Partners is an award-winning technology and management consulting firm. The company focuses on providing end-to-end implementation and support services for the Fadel Partners Intellectual Property Management (IPM) Suite, Oracle Applications, Oracle Fusion Middleware Suite and the Oracle Database.
