Oracle selects TEAM Informatics, Inc. as E2.0 Pillar Partner

TEAM to Demonstrate Siebel UCM Integration at Oracle Open World in San Francisco

MINNEAPOLIS; September 25 — TEAM Informatics, Inc. (“TEAM”) has been chosen by Oracle in three US regions as an E2.0 Pillar Partner focused on enterprise content management (ECM) products. Oracle selects 1 or 2 of its most capable partners in each of its 11 sales regions for the “pillars” comprising its industry-leading Fusion Middleware suite of products.

“To be nominated as the ECM partner within three of these regions is a great honor for TEAM,” said Dave Shannon, TEAM’s president and ceo, “we will work hard to live up to the confidence Oracle has placed with us.” Several of TEAM’s staff will be completing the Oracle Partner Sales Readiness Verification in preparation for the responsibilities associated with this role.

Upcoming during October 11-15, 2009, TEAM will be attending Oracle Open World at the Moscone Center in San Francisco. One of the industry’s highlight events, Open World offers a wealth of opportunities to learn from and interact with industry thought leaders. Several TEAM staff will be present to share their knowledge and experience regarding Oracle Universal Content Management (UCM) implementations.

“TEAM is proud of the track record we have developed with UCM and its integration with other technologies,” says Doug Thompson, TEAM executive vice president. Doug adds, “we welcome the opportunity to share our customer’s successes with potentially thousands of Oracle users.”

Siebel and all Oracle application customers can look forward to the unveiling of TEAM’s Siebel UCM demo that showcases Siebel, Universal Content Management, Web Center Suite and Document Capture. Previews of this demonstration, as well as other TEAM solutions, will be ongoing at the TEAM booth.

Users and vendors interested in UCM and its integration with other technologies are invited to stop by the TEAM Open World booth to exchange ideas!

About TEAM Informatics, Inc.

TEAM is a Minnesota-based software engineering firm with customers in North America, the Australia-New Zealand region, and other parts of the world. TEAM is a preferred Oracle E2.0 Fusion Middleware partner, specializing in areas including portal and enterprise content management. Offerings include expert professional services, managed services such as support and data center hosting, and a growing set of ECM-related products. TEAM is privately held, owned by its 50 employees, and has experienced a 75% annual growth rate over the past decade. For more information refer to www.teaminformatics.com.
