TEAM Informatics, Inc. Moves Ahead with Rebranding and expanded Strategic Plan.

New website and identity support TEAM's bold direction for expansion.

MINNEAPOLIS; September 15 — TEAM Informatics, Inc. ("TEAM") has taken a leadership stance with the recent rebranding and repositioning of the company. The organization has unveiled a new website, visual identity and tagline, and is now moving forward with an expanded strategic business plan.

TEAM, an employee-owned software engineering company based in Minneapolis, provides professional services to clients around the world. The company was formed in 2000 and, during the past decade, has strengthened its product and services offerings focused in the dynamic enterprise content management (ECM) market.

The new logo and tagline, "*Only One Team Can Lead*," represents an aggressive positioning for TEAM, as it looks to the future.

The positioning is based on three factors. The first is the growing and evolving ECM market. The challenge for today's enterprise is to better manage and put to use "unstructured information" — the collection of documents, web content, and digital assets that dominates the volume of information.

The second factor is the strength of TEAM's primary partner, Oracle. In the recent past, Oracle has integrated "best of breed" products into its innovative Fusion Middleware offering — the finest in the industry. While TEAM's leadership in ECM will continue, TEAM is broadening its focus to include key adjacent technologies such as portal and identity/access management.

The third factor is the track record of accomplishment that TEAM has built over the past decade. "Over the years, we have become well known for getting even the toughest jobs done," says Doug Thompson, executive vice president. "The confidence gained from this success fuels our passion for the future."

Dave Shannon, TEAM's chief executive officer, adds, "while TEAM will look a bit different externally, we will continue to be driven internally by the same values that have created our success. These are 'we exist to serve customer needs, people are the source of our strength, and we take great pride in the quality of our work.'"

In addition to its success and growth in North America, TEAM has expanded during the past year with the formation of TEAMFusion5 Pty Ltd in the Australia / New Zealand area. This highly successful market entry has resulted in many new customers and success stories in that region. Other plans for expansion and the introduction of new products are forthcoming.

About TEAM Informatics, Inc.

TEAM is a Minnesota-based software engineering firm with customers in North America, the Australia-New Zealand region, and other parts of the world. TEAM is a preferred E2.0 Fusion Middleware partner with Oracle, specializing in areas such as portal and enterprise content management. Offerings include expert professional services, managed services such as support and data center hosting, and a growing set of ECM-related products. TEAM is privately held, owned by its 50 employees, and has experienced a 75% annual growth rate over the past decade. For more information refer to www.teaminformatics.com.
