- Eliminates time required for wet-ink signatures by unifying and digitizing the process

Product Specifications

HelloSign is the easiest and most secure way for your business to electronically sign documents. Using HelloSign enables quick and accessible document processing through an intuitive, user-friendly signing experience. As a leader in eSignature software, HelloSign provides its users with unique features such as template links, consolidated PDF's, multiple file support, and much more. With bank-level security, businesses never have to worry about the protection of their electronic signatures.

TEAM has partnered with HelloSign to provide Oracle WebCenter Content customers with the ability to integrate HelloSign into their content management processes and workflows. **HelloSign for WebCenter** is the optimal choice for businesses with any number of documents that demand signatures. Emailing, printing, and sending for signatures wastes time and effort through the signing process. TEAM's integration enables users to eliminate that waste by streamlining the process to a single interface, resulting in more accurate tracking, better security, and faster turnaround times. With HelloSign directly in WebCenter Content, users can experience the ease and simplicity of managing their content and their digital signatures all in one place.

About TEAM

TEAM is a global partner with Oracle and a certified Oracle Software Reseller. Offerings include expert professional services, managed services such as support and data center hosting, customized Oracle development team, and a growing set of ECM-related products. In addition, TEAM also focuses on enhancing the experience for all their clients and constantly bringing new features to Oracle products.
